Start your holiday right

If you own a camping trailer, you are probably all too familiar with the situation. You arrive at the campsite and are looking forward to getting settled so your holiday can finally begin. There is just one thing missing: Your camping trailer has to be pushed, pulled and tugged around so it is positioned properly.

With Camper Trolley, an entirely new and revolutionary product, it is far easier to move your camping trailer – at the campsite and when you get home from your holiday. Just hook up Camper Trolley to your trailer and manoeuvre it back and forth effortlessly with the help of a handheld remote control. In addition, there is an automatic soft start function and a brake function.

Everything you need to manoeuvre your camping trailer

When you buy Camper Trolley, you get a total solution. Together with Camper Trolley, you receive a special fitting that is easily mounted on just about any camping trailer in minutes, without the need for tools. You don't have to be particularly technically minded to use Camper Trolley. Dismounting Camper Trolley from the fitting is easy – just remove the split pin, and pull Camper Trolley from the fitting.

All-terrain

Camper Trolley can be used on most indoor and outdoor surfaces thanks to its 2 heavy-duty rubber belts. Two powerful built-in gear motors are op-

erated by a compact high-capacity battery. Camper Trolley has the capacity therefore to move a camping trailer 9 meters a minute. If you have got a trailer, then you can use Camper Trolley with it.

A safe Danish product

Camper Trolley is safe to operate. In addition to having the necessary safety functions, there is an LED that lets you know of any operating errors, the battery status and the current operating situation.

When you buy Camper Trolley, you are buying a newly developed product that has been manufactured according to the most modern principles and with the newest technology. A world-class, revolutionizing consumer concept.

Economical

Camper Trolley is very economical, because its battery is charged by a built-in solar cell. The solar cell has the capacity necessary to cover power requirements under normal operating conditions.

Should the battery be drained, just hook up the charger to a normal 230 volt electrical outlet, and Camper Trolley is ready to go again in no time.
